

TechNova Solutions – Enterprise Policy

Information Security Policy

Fictional sample enterprise document created for the Enterprise Knowledge Ops Agent RAG demonstration.

1. Purpose

This policy defines minimum information-security requirements for employees and contractors accessing TechNova Solutions information and systems.

2. Company Devices

Access to restricted company systems must be performed using company-approved devices. Personal devices must not be used to access restricted systems unless an approved exception exists.

3. Authentication

Users must protect authentication credentials and must not share passwords or authentication tokens with other individuals.

4. Remote Access

Remote access to restricted systems must use the company-approved secure access mechanism and multi-factor authentication where enabled.

5. Confidential Information

Confidential information must only be stored and shared using company-approved storage and collaboration services.

6. Incident Reporting

Suspected security incidents, credential compromise, or accidental disclosure of confidential information must be reported promptly through the approved incident-reporting channel.
